About This Game

Do you sometimes dream of being a vet? Now you can make that dream come true. Create your own practice - you decide what kind of buildings such as stables, paddock or small animal shelter you want to build. And it's also up to you which animal patients you are going to treat. Every day people with sick animals such as guinea pigs, bunnies, budgies, cats, dogs and even horses visit your practice.

Like a real vet you have to take responsibility and tackle the challenge of treating, cleaning and feeding your patients day by day. But, of course, there's plenty of time for playing with the animals and petting them. Sometimes it's even necessary to admit animals for a few days to take care of them.

Even though working with animals is fun, you also enjoy relaxed rides with your own horse at the idyllic beach, in the nearby forest or over vast fields and meadows.
Lovingly take care of your little patients and get to know a real vets day-to-day job.

What a nostalgic kick in the face. I used to play this A LOT when I was around the age of 10 or so and I could spend days on it. There might be a few minor changes from the CD version to the steam version:
- when you're treating animals there's no animation of your character walking or tending to the animal, you have to do it instead. The bad part about that feature is that some of the animals bodyparts are very annoying to find or get right, like the chest on budgies and rabbits.
- the clinic and the outside surroundings have completely changed as well as the city.
- The grapics on the animals are much more detailed and they have animations.
Other than that it seems to be close to the 'original' game when Mindscape was part of the development team.

I'd recommend it to the younger audience, a good game for kids, or grown-ups with a childish soul ;).. Don't let Steam fool you, the game dates back to 2008, but it is enjoyable and fun to play. Even works with Windows 10.
